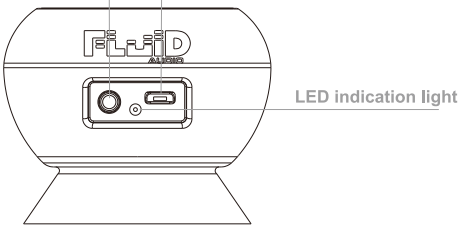
Features

3.5mm input from your guitar for playing

(LED turns yellow when guitar is plugged in)

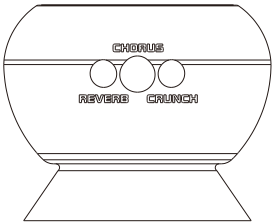
Micro USB input for charging

(LED turns red when USB cable is plugged in and charging. Turns off when fully charged)



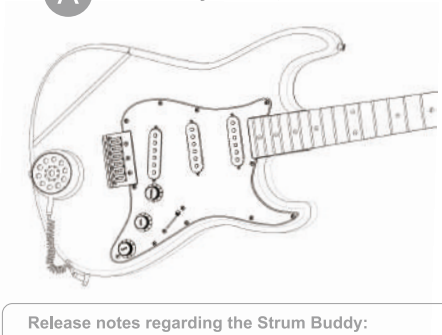
Select sound effect you want to use:

- Reverb: Emulates a small room environment
- Chorus: Two tones, with one slightly delayed
- Crunch: Mildly overdriven, crunchy distortion

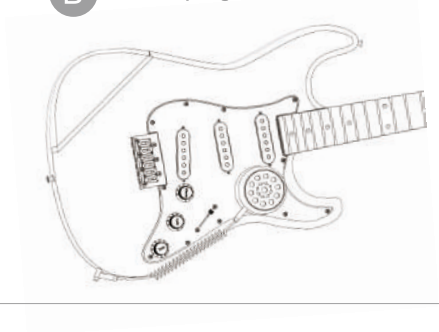


Stick on to your guitar in the best location (depending on guitar body style)

A — On any smooth,wood surface



B — On pickguard



Release notes regarding the Strum Buddy:

1. There is no volume control on the Strum Buddy. Please use your guitar volume to turn down the volume if too loud.
2. All guitar pick-ups are designed differently with varying output sensitivity. Some guitars/pickup positions will be louder than others.
3. Be sure to have fun!
